PROFILE

Experienced Frontend Developer with 15 years of expertise in web and mobile application development, specializing in modern JavaScript frameworks. Extensive experience with Angular from version 1.0 to the latest. Passionate about tackling complex challenges and delivering high-quality solutions. Thrives in fast-paced, time-sensitive environments while balancing multiple responsibilities.

Beyond coding, I am a builder at heart—whether in tech or personal pursuits. I enjoy running, pushing my limits through mountain races and cold-weather challenges. My greatest passion is my family and creating innovative solutions.

SKILLS

Frontend Development:

- JavaScript (ES6, TypeScript, ReactJS, React Native, Angular 1.4 - 15, NextJS)

Backend Development:

- Node.js (Express)
- Supabase

Databases:

- MongoDB
- MySQL

DevOps & Deployment:

- Docker
- Jenkins
- Vercel

Project Management & Collaboration:

- Scrum, Jira, Confluence
- Git, Slack

- OpenAI API (GPT-3, GPT-3.5 Turbo)
- Claude API
- Mistral API
- Together API
- Replicate API
- Prompt Engineering & AI Image Generation (Stable Diffusion)
- AI Projects: askthee.app, photorecipe.com, doodleai.fun, snapfix.vercel.app, writetogrow.app, promptopolis.com, builtin24.com, clipmira.com, renosyncpro.com

Languages:

- Spanish (Fluent)
- English (Fluent)

EDUCATION

John Abbott College, Montreal, QC, Canada

- Web Design and Development (2013)

PROFESSIONAL EXPERIENCE

Cloudracker, Montreal

Front-End Developer

July 2023 – November 2024

- Developed frontend and full-stack applications using Next.js, Prisma, Postmark, and AWS.
- Participated in code reviews and architecture planning to ensure scalable solutions.

PBSC / Lyft, Montreal

Front-End / Mobile Developer

June 2016 – April 2023

- Led the development of Comet V1, a bike-sharing logistics platform (AngularJS 1.4).
- Migrated Comet V1 to Angular 12-14 (Comet V2) in six months with 85% test coverage.
- Integrated payment processors, mapping services, SMS, data visualization, and email automation.
- Built responsive UI from Figma using Bootstrap & Angular Material.
- Collaborated with backend teams to design REST APIs and UI components.
- Assisted in React Native development for PBSC's customer mobile app.
- Developed a QR-code-based contactless assistant tracker during the COVID-19 pandemic.
- Implemented web Bluetooth API for wireless bike lock control.
- Designed a payment testing site and password reset portal for Comet users.
- Enhanced Comet with Progressive Web App (PWA) functionality.

MindGeek, Montreal

Front-End Web Developer

April 2013 – June 2016

- Developed UI components for internal tools using HTML, CSS (Bootstrap/Foundation), and JavaScript.
- Converted PSD designs into responsive HTML/CSS.
- Enhanced UX with JavaScript interactivity.
- Developed admin dashboards using AngularJS and integrated dynamic charts (Highcharts).
- Worked with backend teams to create REST APIs.
- Managed source control using SVN & Git.

Freelance Web Development

Web Developer & Web Admin

- Managed website updates, optimizations, and SEO improvements.
- Integrated Google Analytics for performance tracking.
- Maintained and customized PHP, HTML, and CSS codebases.

Kelly Services (IBM Contractor), Toronto

Bilingual Help Desk Analyst (IT)

August 2007 – April 2012

- Provided Level 2 IT support via phone, email, and remote access.
- Logged and managed IT incidents, escalating critical issues
